

Seacoast Certified for superior climate protection.

First America Polymer Wall Sleeves and Architectural Grilles

- *Best performance and longest life*
- *Built to withstand the toughest climate conditions*
- *Will never rust or corrode*
- *Fade-resistant color blends well with most exteriors*
- *Attractive, fine-textured finish*
- *Competitive advantage over metal in coastal applications*

PROVEN PRODUCTS FOR THE HVAC INDUSTRY

First choice for seacoast installations.

First America's polymer wall sleeve and grille package is seacoast certified, offering the best protection against the worst climate conditions. With polymer, you'll never have to worry about rust or corrosion. Polymer wall sleeves and grilles provide the best performance and longest life in coastal installations. Featuring an attractive, fine-textured finish, these products blend well with most architectural structures while providing superior weather resistance. Choose First America for your coastal installations and enjoy the advantages:

- Polymer provides a competitive advantage over metal products.
- Made with non-metallic compounds that never rust or corrode.
- Polymer meets Underwriters Laboratory flammability rating of UL94-5V.
- Provides superior resistance to dents and scratches.
- Fade-resistant color blends well with most exteriors.

POLYMER WALL SLEEVE

- Molded with a fiberglass-based polymer for added strength and durability.
- Features a slight texture to prevent shine and fingerprints.
- Location holes in the side and top panels for easy fastening of the sleeve to wall openings.
- Comes in both insulated (factory installed) or non-insulated, to meet the requirements of every application.

Part No. WALL-SLEEVE-1PK
Part No. SLEEVE-INSUL-1PK

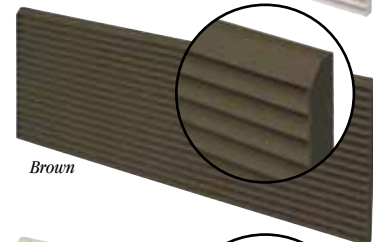

POLYMER ARCHITECTURAL GRILLE

- Provides protection, enhanced appearance and superior weather-resistance.
- These one-piece molded grilles will blend in with most building exteriors.
- Mounts easily from the inside.

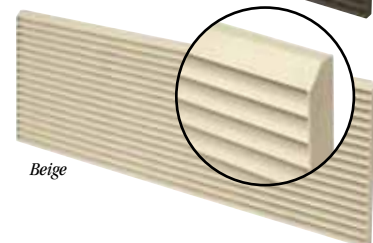

Part No. GRILLE-PLA-ALPIN
